Virtual CISO

Harness C-level cybersecurity expertise without the overhead through SubRosa's tailored vCISO services.

How do you get the benefit of a C-level cybersecurity executive without the high overhead?

Unlock unparalleled cybersecurity leadership without the hefty investment with our Virtual Chief Information Security Officer (vCISO) service. In an era where the demand for top-tier security expertise far outstrips supply, our solution ensures you stay ahead of threats and continuously evolve your security posture, all without the overheads of a full-time executive.

SubRosa's vCISO Services

SubRosa's Virtual Chief Information Security Officer (vCISO) service stands ready to augment your security leadership needs. Whether you're laying the foundation for a robust compliance framework, refining your technology strategies, or charting a transformative security journey, our seasoned advisors are by your side. Our offerings extend from specific compliance oversight to deep dives in areas like data assurance, governance, and risk management. With flexibility at the core, our services range from project-centric tasks to on-demand consultations. We ensure seamless remote guidance, supplemented by on-site support tailored to your unique requirements.
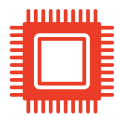

SubRosa's Differentiators

- Highly flexible, bespoke engagements ensure all your security needs are met, without scope creep and overspend.

- Our CISOs have decades of experience producing and implementing corporate cybersecurity strategy and thousands of companies globally.

- Our vCISO services are backed by SubRosa's full arsenal of managed services.

- Our former military and law enforcement consultants command decades of experience on the front lines of tackling cyber threats.
